Custom Spinal LSO Anterior Opening Orthosis

With Tongue

Anterior View

Left Lateral View

Posterior View

Product Overview

This LSO utilizes a single opening. One piece of plastic is measured to wrap around the patient and tighten in the front (anterior), using three straps. An additional piece of plastic (tongue) is placed behind the straps. This brace is a good solution for patients that need total circumferential control.

Spinal Indications

- Post-Operative Lumbar Surgery
- Degenerative Disc Disease
- Spondylolysis
- Spinal Stenosis
- Compression Fracture
- Herniated Disc
- Low Back Pain

Features

- More total circumferential control.

Opening Available

Anterior Opening with Tongue (Pictured), Posterior Opening, Lateral Opening (Right or Left)
